[@bill_anderson](#) is this spam?

IATI @IATI_aid · Nov 6

Congratulations **Steven Flower** - #IATI's new Technical Advisory Group **Chair**.

A man with dark hair and a light beard, wearing a white short-sleeved button-down shirt, stands in a wine cellar. He is holding two green wine bottles, one in each hand, and looking at them with a slight smile. The background consists of wooden shelves filled with numerous wine bottles of various colors and labels. A light green rounded square with the text 'XML' in brown is overlaid on the man's chest.

XML

A man with dark hair and a light beard, wearing a white button-down shirt, stands in a wine cellar. He is holding two wine bottles, one in each hand, and looking at them with a slight smile. The background is filled with wooden shelves containing numerous wine bottles of various colors and labels. Two light green rounded rectangular boxes are overlaid on the image: one on the right side containing the text 'JSON' in blue, and one in the center containing the text 'XML' in brown. The entire image is framed by a teal border with white L-shaped corner markers.

JSON

XML

And...

If you talk to an IATI person for long enough,
they'll start mentioning **“org-ids”**

In the world of Contracting...

org-id.guide

When Carillion collapsed, just 5% of the estimated number of public sector contracts could be found from a Contracts Finder search on 'Carillion'.

Identifiers + company structure data could more quickly map public sector exposure to certain firms.

Vision

a world where all open data about organisations uses reliable, open and interoperable organisation identifiers...

... and not just IATI data.

org-id.guide: a practical approach

<http://www.org-id.guide> | <http://docs.org-id.guide/>

A collaborative project of **open data standards** to create:

- A shared register of organisation identifier lists;
- Tools to make it easier to record high quality organisation identifiers;

Maintained by Open Data Services Co-operative through an open governance process, and open to user-contributions.

org-id.guide: a practical approach

- Coverage of charities, companies and government agencies
- 'Best efforts' research and meta-data: open research process on GitHub
- Currently populated in response to demand (200 entries)
- Working towards comprehensive global coverage

org-id.guide: a practical approach

Working in Any sector ▾

SEE LISTS

Suggested Lists

We think one of the lists below will have a good chance of including the organization(s) you are looking for...

Charity Commission

GB-CHC

87

There are four main types of charity structure in the UK: [1] Charitable incorporated organisation [CIO] [2] charitable company (limited by guarantee) [3] unincorporated association [4] trust

Countries GB

List Code **GB-CHC**

HOW TO USE

The code for this list is **GB-CHC**. When you have located the organization you wish to identify in this list, you should either:

Enter it in an identifier database field prefixed with **GB-CHC**.

GB-CHC-[IDENTIFIER]

EXAMPLES

GB-CHC-279417

GB-CHC-1090095

GB-CHC-1173575

Alternatively, use it within a two-part identifier, with **GB-CHC** as the 'scheme', and the identifier you have located as the 'identifier' field.

org-id.guide: a practical approach

Workflow

- Identify the **type** and **registration location** of organisation
- Search the official register
- Find the identifier
- Record the **list code** and **identifier**

IN-MCA - **U72200KA1997PTC022382**

what we have

- A robust framework and infrastructure for research
- IATI and Open Data Services continue to collaborate, and pool resources.
- Nerdy standard people from Open Contracting and 360Giving continue to contribute to the research and demand for org-id.guide

what we need

org-id.guide

- More work is needed on the infrastructure and community building
- More buy and common leadership from the open data community
- More research(ers)!
- A broader appeal

Thoughts?

Ask me over beer ;)
